BRAND STORY.

The only kind of love pets have is for their owners. Meanwhile, the love from their owners is like no other.

The bond between owners and their furry little angels is getting stronger and stronger when they play together and interact with each other.

This type of joy defines the meaning of having a pet.

This is the story about LOVE TO GO

WHO WE ARE?

Thirty years ago, we opened a factory that specialized in the production of pet toys, with an aim to offer safe and entertaining toys to pets and to add vibrant colors to their lives. We invested in everything from production material to production equipment, regardless of the cost. It was during a time when the pet industry was not heavily regulated, but our pet toys were already up to a standard of export control. It has always been our firm intention to provide safe and high-quality products for pets.

We always believe the “MADE IN CHINA” tags on our products should not only represent the products having competitive pricing but should also represent them having a reliable and top-notch quality. To make this belief a reality, we have firstly started by applying top criteria on choosing raw materials, making sure the materials were safe for pets. Secondly, we have improved the quality and workflow of our production line, making sure the products manufactured are subjected to the highest standard. Lastly, we have made sure our products complied with international standards and regulations, successfully acquiring certifications from around the globe, motivating more people to fall in love with Chinese products. We have been continuing with our mission of producing small and delicate pet toys for thirty years. Nowadays, our products are for sale on Amazon, eBay, and most of the well-known stores in the US, bringing many families a happy time with their pets. Our relationship with LOVE TO GO also began with the founders purchasing and experiencing our products.

THE FOUNDER

The founders of LOVE TO GO are two students who used to study abroad in the UK. When they were in the UK, they were huge fans of our products and always bought toys manufactured by us for their dogs. These pet toys were the dogs' companions when they scampered around the lawn and galloped through the woods. For those days they had to stay in, the toys ensure that they were having no less fun.

Keeping the beautiful memories brought by the pet toys in mind, the two founders visited our pet toy factory as soon as they came back to China to get a brief idea of our production line and processing technology. After the tour, they decided to team up with well-known designers to upgrade the design by adding more fun and trendy elements to the products. Soon after that, the independent brand LOVE TO GO came to life.

WHAT WE WANT TO DO?

The original intention of LOVE TO GO is to be the life quality control officer for the “furry little angels” and provide safe, high-quality, fun and entertaining toy products for them. We know very well that quality is the root of a product, which is also a determining factor of a brand's influence. As long as we manufacture quality products, there would be unshakeable customer loyalty from the pet owners. Therefore, our manufacturing process is in strict accordance with the EU and the US standards, going through inspections at all levels for the design of product safety, material quality, and the quality control of finished products. It also takes another round of national quality inspection and random customs inspection before we could finally put the product on the market. Our domestic and international production lines are in accordance with the same quality standard, demonstrating our determination to create a trustworthy national brand.

LOVE TO GO will continue digging more deeper and sticking to quality products, offering a happier way of life for pet owners and their furry angels.
